PROFESSIONAL SUMMARY

Data Analyst aspirant with hands-on experience in SQL, Python, Power BI, and business analytics. Built end-to-end analytics solutions on 250K+ records, uncovering revenue trends, churn drivers, credit risk patterns, and operational bottlenecks through EDA, statistical analysis, and KPI dashboards. Passionate about translating complex datasets into clear business insights and actionable strategies.

EDUCATION

Savitribai Phule Pune University Bachelor of Engineering – Artificial Intelligence and Data Science SGPA: 10.00 / 10.00	<i>Nov 2022 – Jun 2026</i>
Maharashtra State Board Higher Secondary Certificate (HSC)	<i>Jun 2021 – Mar 2022</i>

TECHNICAL SKILLS

- **Programming:** Python , SQL (PostgreSQL)
- **SQL Concepts:** JOINS, CTEs, Window Functions, Subqueries, Aggregations
- **Data Analysis:** Pandas, NumPy, Data Cleaning, EDA , Feature Engineering
- **Statistical Techniques:** Hypothesis Testing, A/B Testing, ANOVA, Confidence Intervals
- **BI and Visualization:** Power BI, DAX, Power Query, Data Modeling, KPI Dashboards, Matplotlib, Seaborn
- **Tools Platforms:** Git, GitHub, Jupyter Notebook, Streamlit, Google Colab
- **Cloud & Deployment:** AWS (S3, EC2), Render, FastAPI , Streamlit Community Cloud, Power BI Service

PROJECTS

Customer Retention Analytics Platform	Python — Numpy — Power BI — Pandas
• Conducted customer retention analysis on telecom subscriber data to identify key churn drivers, customer behavior patterns, and revenue-risk segments impacting business growth. • Performed exploratory data analysis and feature engineering to evaluate the influence of tenure, contract type, payment methods • Built Power BI dashboard to visualize churn trends, customer segmentation, retention KPIs, and support data-driven retention strategies.	
CreditLens – Credit Risk Analysis	Python — Power BI —Pandas — Seaborn — NumPy
• Analyzed 255K+ loan records and performed end-to-end credit risk assessment to identify major drivers of borrower default. • Conducted EDA, preprocessing, and feature engineering on borrower income, credit score, DTI, and loan attributes; identified poor credit score (< 580) and high DTI (> 40%) as strongest default indicators.	
SalesPulse — Sales Performance Analytics Platform	Python — SQL — Pandas — NumPy —Power BI
• Analyzed 9K+ retail transactions using SQL (JOINS, CTEs, window functions) to identify revenue trends, product performance, and customer buying behavior. • Performed KPI analysis on revenue, profit margin, AOV, and regional sales to uncover business growth opportunities. • Built interactive Power BI dashboards for executive reporting, customer analytics, and product performance monitoring.	

INTERNSHIP EXPERIENCE

Data Science Intern – Rajavi Technology Pvt. Ltd.	<i>Dec 2024 – Jan 2025</i>
• Performed data preprocessing, exploratory analysis, visualization, and dashboard development using Python, SQL, Power BI, and Tableau. • Analyzed structured business datasets using Python and SQL by performing data cleaning, exploratory analysis, and feature engineering to uncover patterns and key performance trends.	

ACHIEVEMENTS

- Selected for the **Women in Engineering (WIE) Program** conducted by **Shikshana Foundation** in collaboration with the **AMADEUS** team.
- Finalist at the **ISDM Code4Change Hackathon** for contributing to a data-driven solution aimed at enhancing the National Judicial Data Grid (NJDG) through analytics and machine learning-driven insights.
