PROFESSIONAL SUMMARY

Aspiring Data Analyst with a strong foundation in Python, SQL, Statistics, and Power BI. Hands-on experience in performing exploratory data analysis, cleaning and transforming real-world datasets, and building interactive dashboards using Power BI and Excel

EDUCATION

Savitribai Phule Pune University

Bachelor of Engineering – Artificial Intelligence and Data Science

Nov 2022 – June 2026

SGPA: 10.00/ 10.00

Maharashtra State Board

HSC from Akutai kalyani girls jr. college

June 2021 – March 2022

Percentage: 72.50%

TECHNICAL SKILLS

- **Data Analysis - Visualization:** Pandas, Matplotlib , Power BI , MS Excel
- **Statistics :** Hypothesis Testing (chi-square , ANOVA), A/B Testing , Confidence Interval , P-value Test
- **Libraries:** Pandas , Numpy , Scikit-learn , SpaCy ,NLTK
- **Programming Language:** Python , SQL(PostgreSQL)
- **Tools Platforms :** Jupyter Notebook , Git , GitHub , Pycharm , Google Collab , Streamlit

PROJECTS

Reimagining the NJDG Dashboard – Code4Change Hackathon (ISDM)

Analyzed large-scale judicial datasets to evaluate limitations in the existing NJDG dashboards Performed data cleaning, transformation, and exploratory data analysis (EDA) to identify trends in case pendency, disposal rates, and court-wise performance. Designed improved analytical dashboards to present actionable insights for faster judicial decision-making Collaborated with cross-functional team to integrate analytics and ML features

Tech Stack: Python, Pandas, NumPy, SQL, Power BI, Scikit-learn, Data Analysis, HuggingFace for FastAPI

Customer Churn Analysis and Prediction

Built an end-to-end machine learning project to analyze and predict telecom customer churn using Python and Scikit-learn. Performed data cleaning, exploratory data analysis, and feature engineering to identify key churn drivers such as contract type, tenure

Tech Stack: Python, Pandas, NumPy, Scikit-learn ,EDA, Streamlit

INTERNSHIP EXPERIENCE

Data Science Intern – Yhills

Nov 2023 – Dec 2023

Engaged in hands-on data analysis projects, performing data collection, cleaning, and transformation to prepare datasets for analysis. Leveraged Python, SQL, Excel, Power BI to generate meaningful insights, develop interactive dashboards, and support strategic business decisions.

Data Science Intern – Rajavi Technology Pvt. Ltd.

Dec 2024 – Jan 2025

Gained practical experience in data cleaning, visualization, and building predictive models. Utilized Python, SQL, Excel, Power BI, and Tableau for extracting insights, creating dashboards, and supporting decision-making processes.

ACHIEVEMENTS

- Chosen for **WIE** program by **Shikshana Foundation** in collaboration with the **AMADEUS** team .
- Selected for Final Showcase at the **ISDM Code4Change Hackathon** as part of a team that developed a data-driven solution, where I contributed to machine learning–based analytical features for the reimagined **National Judicial Data Grid (NJDG)** dashboard.
